Today's Code

https://github.com/bhlvoong/techx_student_exercises/blob/master/ClassesDemo.playground/Contents.swift

https://github.com/bhlvoong/techx_student_exercises/blob/master/BasicTypes.playground/Contents.swift

https://github.com/bhlvoong/techx_student_exercises/tree/master/MentorsList/MentorsList

Lab

Finish up today's lesson on creating this list of mentors (or people) with these requirements:

- Different image for each row
- Correct name and location for each person

Bonus

- Name label is Red with font: "Trebuchet MS Bold 17.0"
 - Location label is font: "Bodoni 72 Book 18.0"
 - For each image, load the image from the internet. For example from a url like this: "http://i.imgur.com/NhZXSmn.jpg"
- (Hint: use URLSession)

Below is the screenshot of how it should look:

Brian

Shanghai

2:15 PM

Derek

I'm located in the internet

Karen
